

## PAm Wildflower Mix

9% Lace Leaf Phacelia, *Phacelia tanacetifolia*  
 4.5% California Poppy, *Eschscholzia californica*  
 1% Alyssum, *Lobularia maritima*  
 2% Birds Eye, *Gilia tricolor*  
 2% Globe Gilia, *Gilia capitata*  
 0.5% Goldfields, *Lasthenia californica*  
 10% Wallflower, *Cheiranthus allioni*  
 10% Calendula, *Calendula officianalis*  
 3% Five Spot, *Nemophila maculata*  
 15% Baby's Breath, *Gypsophila elegans*  
 11% Chinese Forget-Me-Not, *Cynoglossum amabile*  
 15% Bachelor Buttons, *Centaurea cyanus*  
 1% Yarrow, *Achillea millefolium*  
 6% Dwarf Sunflower, *Helianthus annuus*  
 6% Gum Plant, *Grindelia camporum*  
 1% Great Valley Phacelia, *Phacelia ciliata*  
 3% Baby Blue Eyes, *Nemophila menziesii*

### Seed Rate:

12 lbs/acre for broadcast planting  
 10 lbs/acre for drill planting

**Ground Preparation:** Ideal conditions for germination is seed planted at a depth no greater than 1/4 inch in continually moist soil. The best method for planting is direct seeding with drill equipment. Most soil conditions are conducive for drill planting without ground prep. Very heavy/clay soils may need to be worked up if drill is struggling to penetrate the soil surface.

If broadcast seeding is the only option then a fine seed bed is desirable since most of the seeds are very small (like alfalfa). If broadcasting into loose/sandy soil skipping ground prep may be acceptable. If working with heavy/clay soils first use a shallow (3-5 inches) disk or spring-tooth harrow to work up the soil, then plant seed with a broadcaster, then cultipack with a ring roller, which covers the seed by pushing it into the ground. Dragging a piece of chain-link fence behind an ATV or tractor can also be sufficient. The seed should be covered so it can remain moist.

**Planting Methods:** Use a grain drill, no till drill, broadcaster, or even a hand-held broadcaster on small areas to evenly distribute the seed.

**Plant:** After Sept. 10 through Nov. 10, while soil is still warm (above 55°) is an appropriate time to plant wildflowers California. Plant no more than 1/8" deep.

**Management:** If reseeding is desired leaving plants intact until June or July may be necessary. This date will vary depending on planting date and local climate.
