

COVER CROP WORKSHOP

Presented by Project Apis m.

JUNE 28TH

9:30AM -12:00 PM

Come join us to learn about the benefits cover crops can provide for your orchard!

This workshop hosted by Project Apis m. will educate growers and advisors about how cover crops improve soil health and reduce pests while supporting pollination. Expert speakers will be presenting information and techniques on:

- Cover crop effects on nematodes
- Seeds for Bees free cover crop seed program
- Managing organic matter for frost protection
- Integrated Pest Management for orchards
- Pollinator safety
- Concerns about cover crops competing with almond bloom
- Best Management Practices for growers of bee pollinated crops

- **CE/CEU Credits will be offered.**
- **Free to attend! RSVP to reserve lunch.**
- **Free coffee and doughnuts in the morning.**
- **Workshop will conclude by 12:00 PM. Free lunch will be served immediately after. Guests are welcome to stay and talk with speakers or take their lunch to go.**
